Participants Needed for Autism Research!

We are conducting a research study to see if a medication called Pimavanserin can help improve behavioral inflexibility and rigid-compulsive behaviors.

Key Study Eligibility Criteria:

- 16-40 years of age
- Diagnosed with or suspected to have autism
- Have a caregiver willing to assist in study

Participants must complete 5 visits at Center for Autism and the Developing Brain (CADB) in White Plains, NY over about 2 months. Compensation will be provided for study visits and travel.

Scan the QR code to visit our lab website and learn more about the study.
