

# Participants Needed!

The Lab of Translational Neuroimaging at Boston Children's Hospital is looking for teens **with and without autism** for a study on face processing.

We are looking for people who:

- Are 15 to 18 years old
- Have an IQ greater than 70
- Are able to complete an MRI scan

Receive \$150 for completing the study!

This study involves:

1. A virtual visit involving a series of computer activities
2. Completing online questionnaires at home
3. An in-person visit for an MRI scan at 2 Brookline Place

If interested, please email [CohenLab@childrens.harvard.edu](mailto:CohenLab@childrens.harvard.edu) about the Face Processing Study
