

ACCOMPLISHMENTS

IN 2023, THE AUTISM SCIENCE FOUNDATION:

Surpassed 6 million in cumulative autism research funding.

Funded 22 new grants to study the causes of autism and improve interventions.

Added two more sites to the Next Gen Sibs program to study signs of autism in the offspring of siblings of autistic people.

Worked with the CDC to publish data on the prevalence of profound autism.

Featured 14 neurodiverse musicians in our first "Share the Stage" Concert.

Launched a unique "Participate in Research" website to match families with studies recruiting participants. Over 100 research studies signed up in the first month.

Produced weekly award-winning podcast to share autism science information with families.

Partnered with the Profound Autism Alliance to launch "ECHO: Autism" which educates clinicians about treating dangerous behaviors.
