

AUTISM RESEARCH

NOW RECRUITING

Children, teens, and young adults on the autism spectrum aged 7-24 with normal or corrected-to-normal hearing and vision for autism research designed to help us better understand sensory differences associated with autism.

Participants are compensated for their time at a rate of \$10/ half hour and typically attend between 1-4 appointments to complete between 4-10 hours of assessments (vocabulary, problem solving, language & computer games.) For more information please contact:
