

A PILOT STUDY EXPLORING
COMMUNICATION CHALLENGES AND
ASSISTIVE TECHNOLOGIES IN CROSS-
NEUROTYPE INTERACTIONS

NCATS SURVEY

You are invited to participate in a new online research study led by Zachary A. Miller at the University of Pittsburgh.

STUDY INFORMATION

What is involved?

- You are being asked to complete several online surveys about your thoughts, feelings, interest, and daily life, which should take 60 minutes to complete.
- You can take breaks and continue at your pace where you left off

Purpose of the Research

- The purpose of this research is to identify the emotional effects of conversations between autistic and nonautistic people. Additionally, we look to learn the different opinions regarding technology and its abilities to help with communication between different types of thinkers.
- The study will be for all teens and young adults with autism spectrum disorder (ASD) to pave the way for better communication methods in various settings.

You may be eligible if

- You have a self/medical diagnosis of ASD
- You are 18–35 years old
- You can read English at a 6th grade level or higher

What will I receive if I participate?

You will be eligible for up to \$100 compensation for completing the survey.
