

Is your child autistic? Are they 8-10 years old?

They may be eligible to participate in a research study about language development at Boston University!

What's involved?

3 visits to Boston University (~2.5 hours each) to complete activities that involve:

Listening, looking, and speaking

Parent questionnaires

Measuring brain function using child-friendly and safe magnetic resonance imaging (MRI)

Who can participate?

Children who:

- are 8-10 years old
- are autistic or non-autistic
- are speaking / can communicate without an assistive device
- Have been exposed to English since birth and are primary English speakers.

Participants will receive:

- a \$50 gift card for each visit completed
- a brief summary of language activities to guide understanding of your child's language development
- a picture of their brain from the MRI
